K.C. TECHNICAL SERVICES INC.

K.C. Model VB-245
Automatic Vertical Bagging
Machine offers distinct
advantages over the use of
"pre-made" bags.

The machine actually forms the bag around the product using center-folded film, as opposed to inserting the product into a pre-formed bag. This reduces raw material costs by 60 percent or more and increases productivity.

K.C. can provide a stand alone unit or a fully automatic integrated manufacturing module.

K.C.
BAGGER
SAVE 60% ON
MATERIAL
COSTS
