

# Allenair

Quality-Delivery & Service Since 1947

## 48 hours delivery

### A. Valve-In Head Cylinders

- requires only one air connection
- build-in independent speed control screws for fine adjustment
- reduced pipe connections, lower installation costs, greater reliability

### B. Cylinders

- honed brass, corrosion-resistant tube
- screw machined high tensile aluminum heads
- ground and polished stainless steel rod
- nylon bearing
- hardened steel snap rings secure heads
- bore sizes 1/2" - 4"
- all stainless steel cylinders available

### C. Solenoid Valves

- 2 & 3 way, 1/8 & 1/4 in NPT Solenoid Valves
- general purpose or explosion proof enclosures stainless steel plunger, spring and housing for positive return, longer life
- class "B" (130°C) molded 7-watt coil with 24" leads with Allenair "Time-A-Valve"... solid state electronic timer, integral with Allenair Solenoid Operators

### D. Cyl-Checks

- designed for precision feed control
- used with pneumatic cylinder to eliminate chatter caused by variations in thrust, irregular loads
- infinitely variable speed rate, easily adjustable
- 3000 lb. load capacity

### E. Rotary Index Tables

- guaranteed accuracy to within  $\pm 0.001$  permits loading and unloading of parts while machining continues
- all parts susceptible to wear specially hardened working parts enclosed to protect against dust, dirt and chips
